# ASSIGNMENT OF RESEARCH OUTPUTS

1. You can assign your research outputs to your ORCiD in different ways. Click **Add works** on the last line of your profile to see options.

2. The fastest way is establishing a link to your records in selected trusted organizations. Select **Search & link** and click on the name of the organization in which you have a record in the menu. After authorizing access, the system will automatically search for documents with your name. Select your records and confirm the connection with ORCiD. Entries will automatically appear on your ORCiD profile. Video tutorial
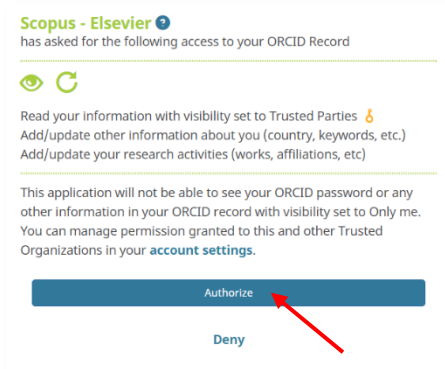

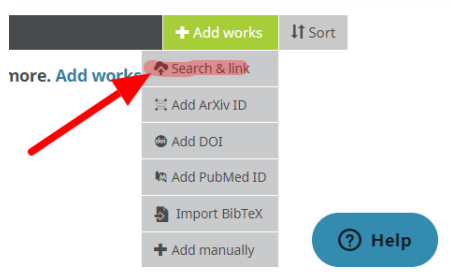

3. The basic information about the record is filled in automatically also when you enter the DOI. Select **Add DOI** and copy the identifier of your paper into the empty field.
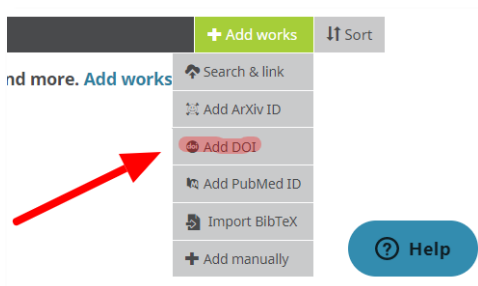

4. You can also enter information about the record completely manually. Just select the **Add manually** option and fill in the required fields in the displayed form.
